YiCORA

AI-powered tools helping African creators and businesses
generate music, voices, and localized content.

team@yicora.com

01 The Problem

Problem 1 : Barriers

Africa's creators have ideas but limited access to powerful creative infrastructure.
Creating and scaling content across languages and markets is expensive and technically difficult.

Creators and businesses struggle with:

Content Localization
- Translating, creating and dubbing video content into African and global languages is expensive and slow.

Flawed Audio Output
- When global models attempt to read or translate African languages or English with local accents, they produce unnatural phrasing, incorrect tonality, and awkward, robotic Westernized pronunciations.

Language Barriers
- African creators often struggle to reach audiences beyond their immediate language and region.

Problem 2 : Data Collection

The "Western Dataset" Bias:

Major global AI models (like Gemini, ChatGPT, or generic text-to-speech tools) are trained primarily on Western datasets.

Because global tech companies build their AI using mostly American and European internet data, the systems become highly intelligent in Western accents, grammar, and cultural norms, but remain completely blind to how people in other parts of the world actually talk and do business.

02 The Solution

DUB
Translate and dub video content across languages.

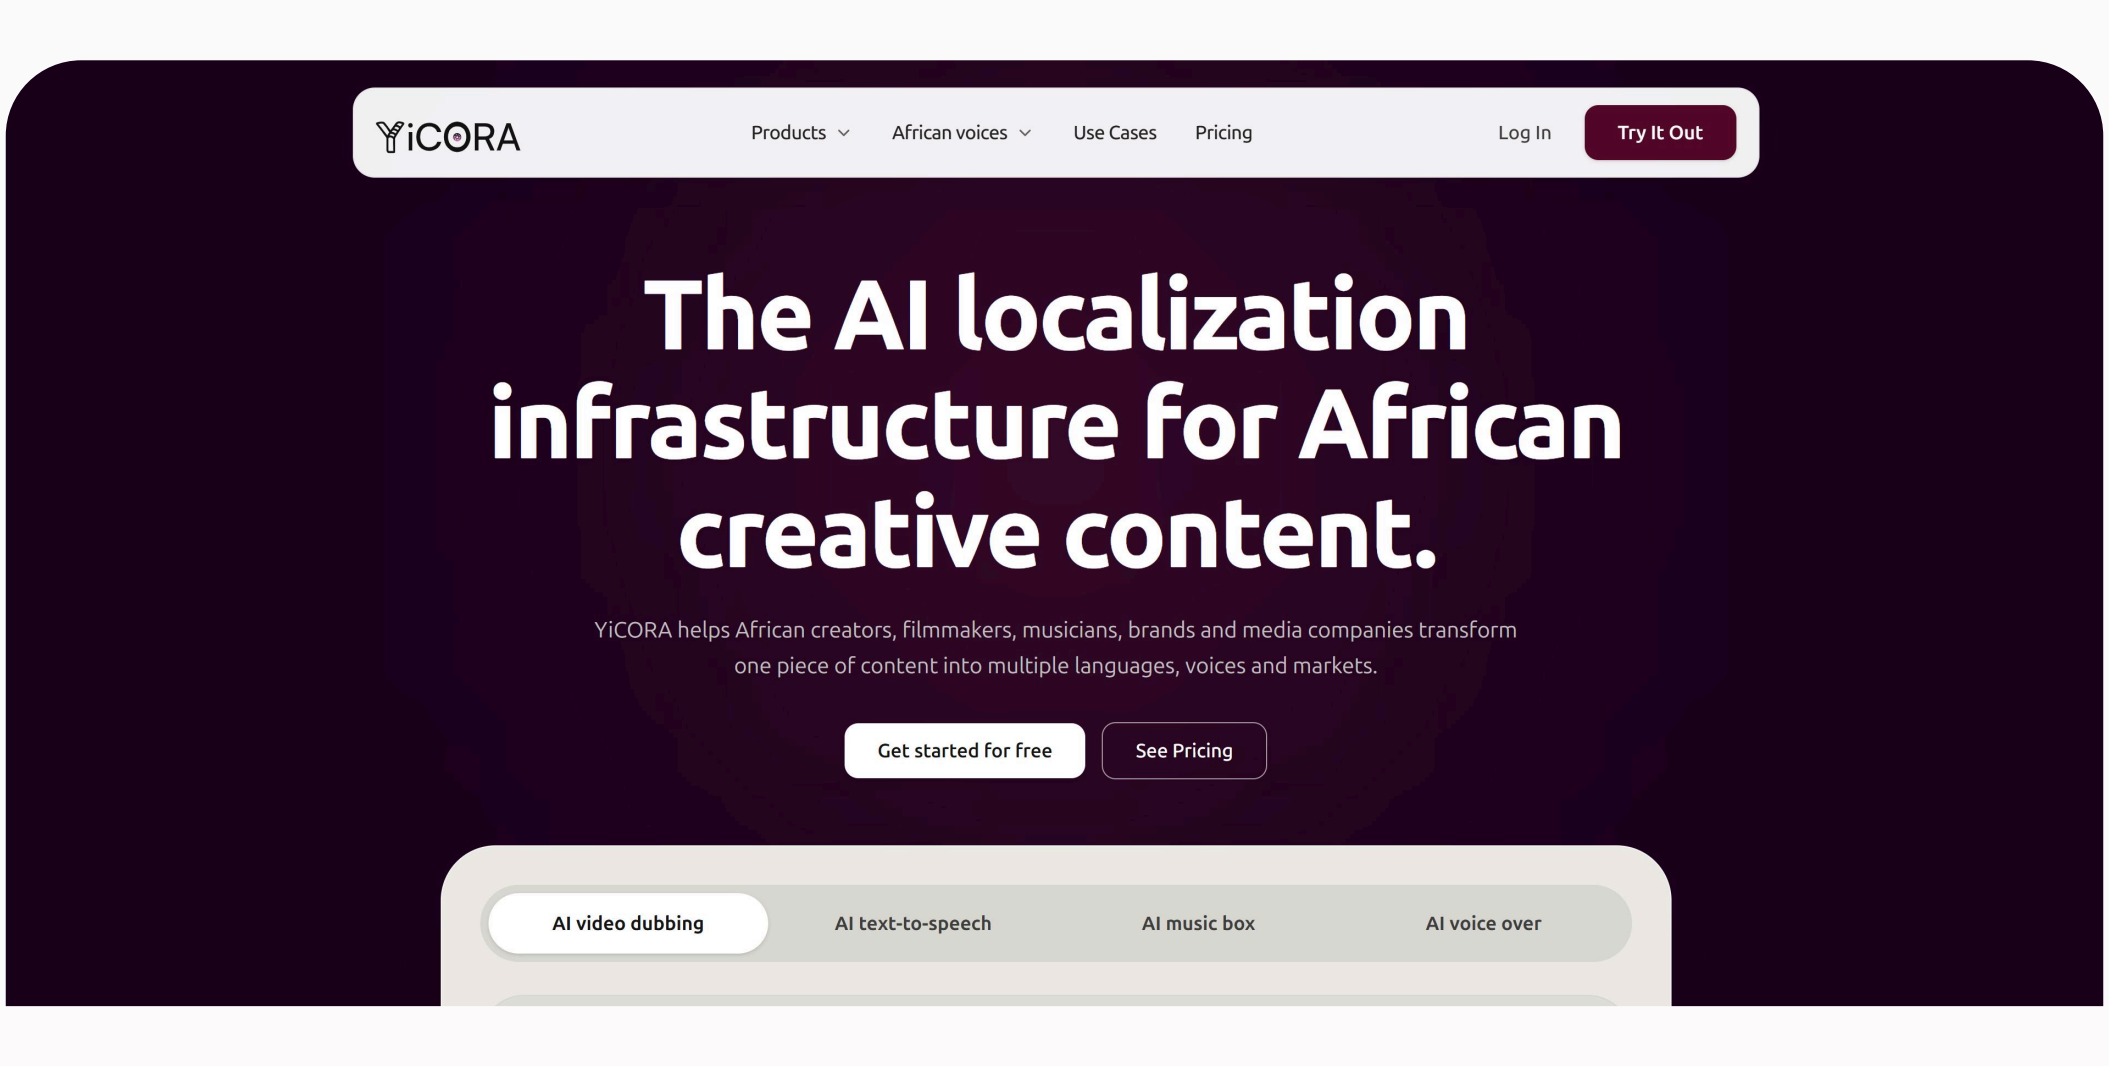
VOICE
Generate AI voiceovers of real African accents

YiCORA Trained Models
(the AI creative infrastructure for Africa)

MUSIC BOX
Translate and dub video content across languages.

SPEECH
Generate African speech from text

Check it out: Yicora Website

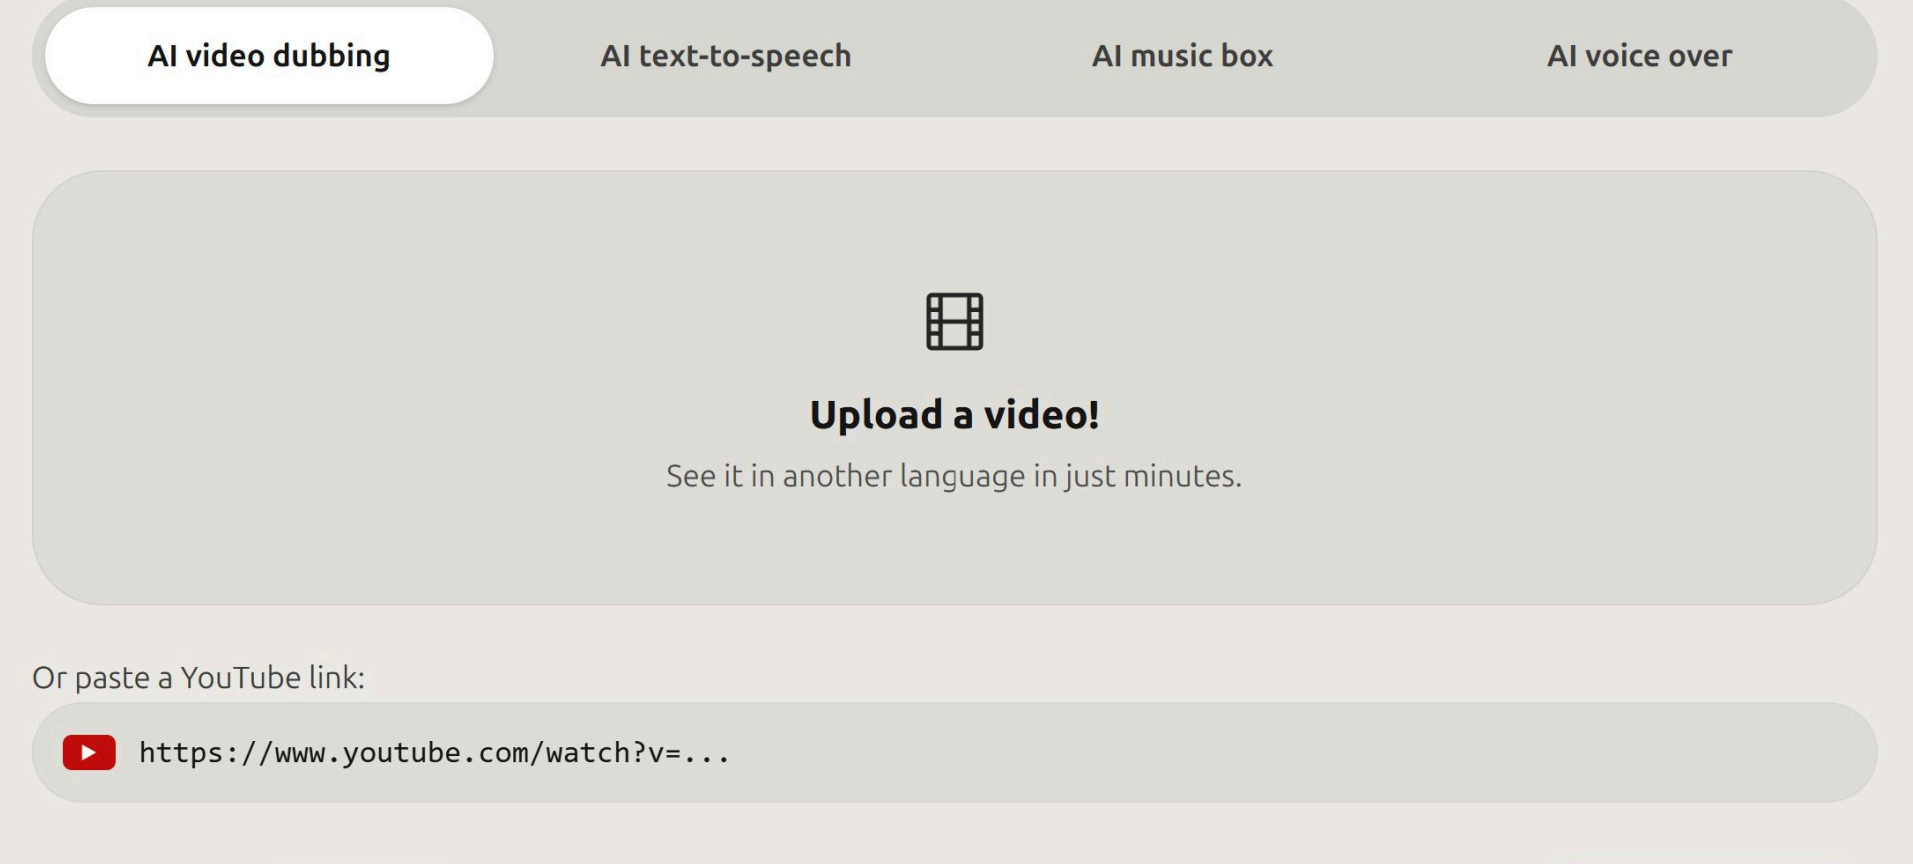


The AI localization infrastructure for African creative content.

YiCORA helps African creators, filmmakers, musicians, brands and media companies transform one piece of content into multiple languages, voices and markets.

03 How YiCORA Works

From Idea → AI (Yicora Trained Models)→ Finished Content



Upload a video!
See it in another language in just minutes.

Or paste a YouTube link:
https://www.youtube.com/watch?v=...

Translate to: Yoruba

04 Business Model

Business Model

One-time payment and
Users purchase credits based on AI generation usage.

Subscription Plans	Price	Credits
Starter	$15(20,000)	200 credits + 10% of top-ups
Creator	$45(60,000)	500 credits + 10% of top-ups
Pro	$125(160,000	1000 credits + 10% of top-ups

Business Model

All Revenue Streams

Subscription Plans
For frequent creators.

Business/API Plans
For companies and platforms.

Enterprise Solutions
For media companies, agencies, and large organizations.

05 Go-To Market Strategy

Go To Market Strategy

UGC Growth Loop

Creator uses YiCORA → Creates multilingual content → Shares results → New creators discover YiCORA → New users sign up.

06 The Traction

Traction

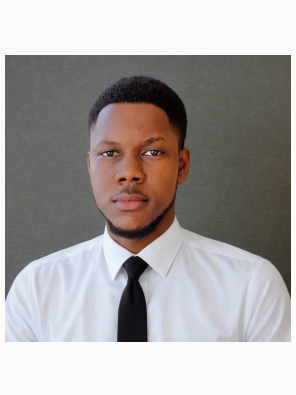
Early evidence of audience-building and market interest.

We have:

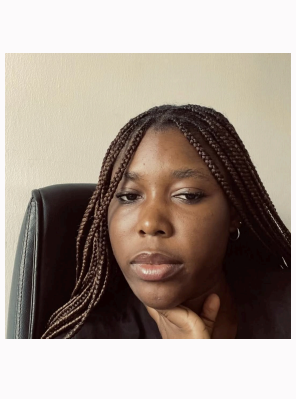
✓ Built a community of 1,000+ people looking forward to the MVP.
✓ Developed the YiCORA product concept and MVP architecture
✓ Defined initial product workflows
✓ Identified our first target users
✓ Created a direct channel for early user feedback and beta testing.

07 The Team

The Team



Daniel Ezediniru, Chief Executive Officer
BEng in Electrical, Electronics and Computer Engineering
2nd time founder, software engineer and product designer.
Experience across edtech, SaaS, B2C and B2Bs.



Faith Olohijere, Community Manager
Bsc in Economics
Community Manager
Experience across edtech, SaaS, Blockchain, AI, Fintech and Social Impact

Building the founding team strategically

Current: Founder-led product development.

Next key hires/partners:

- AI/ML or AI infrastructure team
- Growth specialist

08 The Ask

The Ask

$30,000
